

Acceptance Testing

UAT Execution & Report Submission

Date	03 October 2026
Team ID	SWTID-2026-6919
Project Name	Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the User Acceptance Testing (UAT) coverage and open issues for the “Script-Controlled ACL - Restrict Record Access Based on Field Value” project at the time of release to UAT. The testing focuses on validating that record access is correctly controlled according to the configured field value and that unauthorized users cannot access restricted records.

2. Defect Analysis

This report records UAT defects by resolution and severity. Values below are a project-ready template and should be updated with the actual defect counts recorded during UAT.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

3. Test Case Analysis

This section summarizes the UAT test cases for Script-Controlled ACL behavior, including authorized access, restricted access, field-value changes, and validation of access after record updates.

Section	Total Cases	Not Tested	Fail	Pass
ACL Configuration & Script Logic	4	4	0	0
Authorized User Access	3	3	0	0
Restricted User Access	3	3	0	0
Field Value Change / Re-evaluation	3	3	0	0
Negative & Boundary Scenarios	2	2	0	0
Audit / Error Handling	2	2	0	0
Total	17	17	0	0

4. UAT Scenario Coverage

Test ID	Scenario	Expected UAT Outcome	Status
UAT-01	Authorized access	User whose attributes satisfy the configured field-value condition can access the record.	Not Executed
UAT-02	Restricted access	User whose attributes do not satisfy the condition is denied access to the record.	Not Executed
UAT-03	Field-value change	Changing the controlling field value causes access to be re-evaluated according to the ACL script.	Not Executed
UAT-04	Record update	Access remains consistent after updating the record and refreshing/re-querying the record.	Not Executed
UAT-05	Boundary / missing value	Blank, null, unexpected, or boundary field values are handled according to the requirement.	Not Executed
UAT-06	Security validation	Direct navigation/API-style access does not bypass the configured ACL restriction.	Not Executed

5. Final Report Output

UAT Status	Not Executed / Pending UAT
Total Planned Test Cases	17
Passed	0
Failed	0
Not Tested	17
Open Critical Issues	0
Business Acceptance	Pending

6. Version Control

Version	Date	Description	Prepared By
1.0	03 October 2026	Initial UAT report template prepared for Script-Controlled ACL project	Project Team

7. UAT Sign-off
